Features

4 Integrative Thinking Three Ways: Creative Resolutions to Wicked Problems
by Jennifer Riel and Roger Martin
Integrative Thinking is not a one-size-fits-all proposition. Introducing three types of integrations that occur across contexts.

16 From Blueprint to Genetic Code: The Merits of an Evolutionary Approach to Design by Tim Brown
Like everything in life, design is evolving, forcing us to give up the very essence of the Newtonian notion of design: the blueprint.

22 The New Agenda for Business Schools: Creating Problem Solvers for the World by Anita McGahan
Business schools have to start training leaders to deal with the world’s biggest problems.

28 The Era of the Participatory System by Hilary Cottam
By mid-century, participatory systems will seem as commonplace as global bureaucracies seem today.

34 The Architecture of Kindness by Mihnea Moldoveanu
Dr. Li Ka-shing describes the goals of his charitable giving and why he views his Foundation as his ‘third son’.

40 Observe First, Design Second: Taming the Traps of Traditional Thinking by Matt May
Observation is a critical skill for those in pursuit of wicked problems.

48 The Role of the Chair: Orchestrating the Board by David Beatty
The responsibilities of Board Chairs have evolved; so too must the Chairs.

54 Risky Trust: How Teams Build Trust Despite High Risk by Faiza Rashid and Amy Edmondson
Projects that involve multiple organizations can still involve trust. Here’s how.

60 Capital Markets Challenges: A Veteran’s Viewpoint by Karen Christensen
Paul Halpern talks about the key issues his Institute is watching these days.

66 Mind the Gaps: The Challenges of Using Design to Scale Solutions by Robert Fabricant
Four obstacles often come between creative approaches and large-scale implementations.

72 Help Wanted 2.0: Engaging Others to Tackle Wicked Problems by Bansi Nagi and Helen Walters
Every organization can tackle wicked problems - if it is willing to welcome collaborators.
Idea Exchange

“If you take a look at the global threats we’re facing, some of them are actually existential threats to human civilization.”

– Larry Brilliant, p. 14
